

## BRAZILIAN PAVILION

### JOIN THE BRAZILIAN PAVILION AT INTERSOLAR MEXICO!

#### Profit From Mexico's Solar Rise

With 4 GW of total installed PV capacity, Mexico overtook Chile as Latin America's largest solar market by the end of 2018. More than 40 million electricity customers, growing demand for power, and significant potential untapped renewable energy resources, Mexico is well positioned to expand its power generation from renewables. The energy reform legislation also reiterated Mexico's aggressive target to generate 35% of its power from clean sources by 2024 and imposed interim targets to reach that goal.

Intersolar Mexico sits at the cross-section of photovoltaics, solar heating & cooling technologies, and energy storage. The event serves as the industry's go-to source for invaluable technology trends and premier B2B contacts in the promising Mexican solar market. In its second edition from September 8-10, Intersolar Mexico together with the co-located THE GREEN EXPO® and AQUATECH MEXICO will move to a new venue – Centro Citibanamex.

#### Included in your Pavilion Booth Package

- 9m<sup>2</sup> booth with hard walls
